

The background is a dark gray grid. Overlaid on the grid are three concentric, light gray arches centered in the upper half of the image. The arches are composed of thin lines. The word "Beyond" is written in a serif font, colored in a reddish-orange hue, positioned to the right of the arches.

Beyond

The background is a dark gray grid. Overlaid on the grid is a series of three concentric, semi-circular arches centered in the upper half of the image. The arches are drawn with thin, light gray lines. The text 'the Beauty' is positioned in the lower-left quadrant of the image.

the Beauty

Every door handle,
holds a cherished memory,
a reminder of
the first touch
experienced within
architectural spaces.

in 1999

Our complex, a privately owned architectural hardware manufacturer, was founded.

It served to produce various and sundry industrial parts and instruments, including laboratory equipment, industrial sand and polish robots, and professional molding specialized in hardware in cold and hot chamber die casting.

in 2014

we established a new brand, named Tik, by which to supply premium architectural hardware with diverse fittings in many styles, including all types of handles and accessories.

in 2020

the proud T.I.K Company was established (Commercial Number: 14009535722). It has provided its customers with distinctly first-rate products beyond national borders, manufactured by high-tech machinery, in order to fulfill their needs with convenience and ease.

In fact, our purpose is to apply our capabilities, by full-fledged designers and technical teams, to offer splendid doorware at reasonable prices. Tik does its best to attain this ultimate goal to contribute to the economy.

We sincerely hope we will make it!

T.I.K intends to create competition in the marketplace by added value for customers and to develop and introduce its products in domestic markets as well as international arenas and niche. Hence, Our key focus is on thriving in conjunction with our commitment to efficacious function and inclination to improve along with discovering and training talents which leads to remarkable enhancement of all processes.

'creativity and smart thinking are against tradition' this statement results in uniqueness and genuine prosperity, which indicates Tik's focal tent.

Tik and Handle

Our legendary Door Handles Workshop was held in 1999 at our facility in Isfahan, Iran. Overnight, with the best endeavors designers and the technical team made, a product that had long been considered of little interest was turned into a significant element in the design theme on which architects and designers focus meticulously to flourish their creative visions.

It All Started with Molding...

As one of the pioneers in the production of hot chamber, and cold chamber die-casting molds over the country, the founder of T.I.K company localized those molds in Iran for the first time. Ever since Tik Brand has been born, the main focus of its trade is as to classic and modern hardware for doors, windows, cabinets, etc.

Throughout two decades, TIKHANDLE has built a heritage of craftsmanship and precious abilities that are still used today. The company feels confident about the future with the same spirit as the very first day. This power drives TIKHANDLE to reach higher, produce new high-tech models, and accept new challenges. All along the production chain, no matter if forging, polishing, or branding, the power of experience and the courage of ambition give birth to a product that is much more than a simple furnishing accessory.

It is a philosophy, a business idea, a way of conceiving work.
This is the style of TIKHANDLE.

TIKHANDLE thanks to the high quality of materials and new technologies in production, offers a special warranty on its products. Warranty terms have been extended, starting from the date of purchase, according to the finishes as follows:

Brass:	ZAMAK:	Stainless Steel:	Aluminium:
10 years	8 years	10 years	5 years

Warranty provides, at the discretion of the Central Office, the repair or replacement of a defective product free of charge during the warranty period.

Should any product become discontinued, the Central Office reserves the right to replace it with a similar product or to refund the original purchase cost. Determination of causes, responsibilities, and presence of manufacturing defects will be at the discretion of the sole TIKHANDLE. Dispatch cost for this evaluation will be at the purchaser's charge. Once verified, Central Office TIKHANDLE responsibility and warranty terms compliance, other costs such as additional material dispatch and its return back to the client will be at the Central Office's charge. TIKHANDLE will not be liable in any case of installation, repair, and replacement costs as well as loss or damages.

Prices

Please note that all prices given in this guide are in US dollars.

Freight

Tehran, Iran

Terms

Payment is fully required by Cash.

Order Acknowledgements

When T.I.K receives an order, an "Order Acknowledgment" is issued to the customer which details the order and gives the expected shipment date. Please check the items and pricing on the acknowledgment thoroughly to ensure accuracy.

Returns

T.I.K accepts returns of stock items free of charge by reordering another stock. Please contact us for "Return Goods Authorization" (RGA). Goods are only credited if a customer has been issued an RGA and the goods are received. Once the goods are received, TIK will issue a credit memo, which can be applied to the item exchange.

If the items are not returned within 45 days, the RGA is voided. Custom special order products are not returnable.

Order Cancellations

We will do our best to accommodate order changes and or cancellations prior to production. Orders in production cannot be modified or canceled.

Standard Discount

Discount amounts are negotiable regarding the customer buying program.

Product Warranties and Liability

1.

All goods sold are warranted to be free from defects in material and workmanship, the foregoing comprises the seller's sole and entire warranty provided:

a) The Company has been notified within the time frame from the purchase date from T.I.K as listed under "Term" in the chart below and been given the opportunity of inspection by the return of any alleged defective Product to the company, free and clear of all liens and encumbrances, transportation prepaid, accompanied by the statement of defects and proof of purchase: and

b) The Product has not been modified, abused, misused, or improperly installed, maintained and/or repaired during such period. All other warranties, written or oral, expressed or implied, and including but not limited to warranties of merchantability or fitness for intended purpose, are expressly excluded.

2.

Seller's sole obligation under these warranties, during the period after the date of manufacture as listed below, shall be to issue credit, repair, or replace any item or part thereof, which is proved to be other than as warranted. Seller shall have the sole right to determine whether such parts shall be repaired or replaced or whether credit shall be issued. No allowances shall be made for any labor charges for the replacement of parts, adjustments or repairs, or any other work. In no event shall the seller be liable for collateral or consequential damages.

3.

We do not warrant defects caused by improper installation nor against the consequences of uses for which our products were not designed, especially if a TIK lever handle is used with a non-T.I.K component part such as a mortise lock or tubular latch other than recommended.

Our warranty shall only apply if, and to the extent that the purchaser can show that the T.I.K Product itself was defective and the defect was not related to alteration or to adverse effects of such use with a non-T.I.K Product or components.

4.

If goods are claimed to be other than as warranted, the seller, upon notice promptly given, will either examine the goods at the buyer's site or issue shipping instructions for return to the seller (transportation costs prepaid by buyer). These warranties shall not extend to any goods or parts thereof which have been subjected to misuse or neglect, damage by accident, rendered defective by reason of improper installation, or by the performance of repairs, modifications, or attachment to other products outside of the seller's plant.

Ordering Guidelines

To place an order directly with TIKHANDLE, please email orderdesk@tikhandle.com

When ordering locksets, such as KEYS door handles, you will use a numbering string as shown in our example below:

Exapmle: Standard Keys Lock - K

K — Lock Type
 HO — Handing
 10 — Lever Design
 R — Trim Set
 Z — Ma terial
 RH — Handing
 1 — Finish Code
 60 — Door Thickness

Door handles, especially ones in the bathroom, kitchen, or entrance, get dirtier than bedroom door handles. Besides, their cleaning process is a bit tricky due to plating and their appearance. An opaque door handle, even when thoroughly clean, seems dirty and arouses a feeling of a messy house. In order to wipe the door handle, we must utilize suitable detergent in addition to correct cleansing method, which averts abrasion or any sort of damage to the plating.

Stainless steel needs to be cleaned for aesthetic considerations and to preserve corrosion resistance. Stainless steel is protected from corrosion by a thin layer of chromium oxide. Oxygen from the atmosphere combines with the chromium in the stainless steel to form this passive chromium oxide film that protects from further corrosion. Any contamination of the surface by dirt, or other material, hinders this passivation process and traps corrosive agents, reducing corrosion protection. Thus, some form of routine cleaning is necessary to preserve the appearance and integrity of the surface. Stainless steel surfaces thrive with frequent cleaning because there is no surface coating to wear off. A soft cloth and clean warm water should always be the first choice for mild stains, loose dirt, and soil. For more aggressive cleaning, a small amount of vinegar can be added to warm water. A final rinse with clean water and a dry wipe will complete the process and eliminate the possibility of water spots. Cleaning with solutions containing chlorine, such as acetone, methyl alcohol, and mineral spirits must be avoided.

Brass and Bronze are both copper alloys (Brass is copper and zinc, Bronze is copper and tin) and when exposed to air and moisture, they will develop a greenish layer of build-up on its surface called patina. While this darkened finish does add character to the brass and bronze, some consider it unsightly and would prefer their bronze to look clean and shiny. To clean the patina, rinse the brass or bronze with warm water and dry thoroughly to remove dust and particles. Mix two tablespoons of baking soda and a teaspoon of lemon juice until a soft paste forms. Wearing rubber gloves apply the paste with a polishing cloth and rub in small circular motions and repeat until the desired effect is reached. Let sit for 20 to 30 minutes and then rinse thoroughly with warm water to remove the paste. Buff dry with a clean towel. If the patina still remains repeat the process. Cleaning with solutions containing chlorine, such as acetone, methyl alcohol, and mineral spirits must be avoided.

Aluminum is the earth's most abundant metal element and is used for a wide array of applications ranging from aircraft skins to baseball bats. Anodizing provides aluminum with a very durable, corrosion-resistant, and long-lasting finish. To clean, squeeze one or two drops of mild dishwashing detergent into a cup of water. Apply the soapy water to a sponge and scrub the aluminum surface vigorously. Rinse the anodized aluminum surface with clean water and then dry it with towels. cleaning with solutions containing harsh acidic or alkaline cleaners as they may destroy your finish and should be avoided.

NOTE: Do not use any sort of acidic substance, glass cleaner, washing powder, or scale remover.

“ The door handle
is the handshake
of the building. ”
